Education

High School Graduate

Multimedia
2020 - 2023

Skills

Technical Skills

- SIP / VoIP
- Asterisk
- RTP Streaming
- Python Backend
- Linux Infrastructure
- AI Monitoring
- Automation Systems
- Azure Communication Services
- AWS / EC2
- Nginx / systemd

Tools

- Asterisk
- FreeSWITCH (Learning)
- AWS
- Azure
- FastAPI Concepts

Video Editing

- Motion Graphics

Creative Tools

- Adobe Premiere Pro

Languages

- English (Working)
- Indonesian (Native)

Zain

Voice Systems Builder

Self-taught systems builder focused on real-time voice infrastructure, SIP-based communication systems, backend orchestration, and AI-assisted monitoring. Experienced in building and operating voice workflows using Asterisk, custom AMD systems, live audio streaming pipelines, and Linux infrastructure.

Work Experience

Independent Voice Systems Builder

Jan 2025 - Present

- Built and operated a Voice Operations SaaS platform for SIP routing and automated communication workflows.
- Designed multi-provider voice routing architecture using SIP trunk and Azure Communication Services.
- Developed a custom AMD (Answering Machine Detection) system with real-time audio detection.
- Built Voxi, an AI monitoring assistant for infrastructure alerts and operational monitoring.
- Designed media-heavy streaming pipelines with RTP optimization and Asterisk integration.
- Managed Linux infrastructure using EC2 Ubuntu, Nginx, and System services.

Social Media Team

Okto 2022 - Jan 2023

- Created animation and video editing content for company social media platforms.

Projects

Voice Operations SaaS Platform

Description:

Real-time voice system for call routing, cloud communication integration, and automated voice workflows.

Voxi AI Monitoring Assistant

Description:

Voice-based monitoring assistant capable of operational alerts, phone-call escalation, and STT/TTS interaction workflows.

Voice Streaming & Media Pipeline

Description:

Media-heavy audio streaming system with RTP optimization, live audio pipelines, and planned FreeSWITCH media-layer integration.

Core Systems

- SIP Routing & PBX Logic
- Real-time Audio Streaming
- Custom AMD Engine
- AI-assisted Monitoring
- Linux Infrastructure Operations
- Backend Orchestration Systems
